

Convert each decimal to a fraction.

Answers

$\frac{9}{10}$

Converting from a fraction to a decimal is simple as long as you remember the place values.

| | | | | |
|------|------|---|--------|------------|
| | | . | | |
| tens | ones | | tenths | hundredths |

The example above is nine-tenths. Lets look at how we'd write that as a decimal.

| | | | | |
|------|------|---|--------|------------|
| | 0 | . | 9 | |
| tens | ones | | tenths | hundredths |

$\frac{63}{100}$

We do the same thing for the problem above only make sure we're in the hundredths place.

| | | | | | |
|------|------|---|--------|------------|--|
| | | . | 6 | 3 | |
| tens | ones | | tenths | hundredths | |

- Ex. 0.01
1. _____
 2. _____
 3. _____
 4. _____
 5. _____
 6. _____
 7. _____
 8. _____
 9. _____
 10. _____
 11. _____
 12. _____
 13. _____
 14. _____
 15. _____
 16. _____
 17. _____
 18. _____
 19. _____
 20. _____
