

Convert each decimal to a fraction.

$$\frac{9}{10}$$

Converting from a fraction to a decimal is simple as long as you remember the place values.

	.		
tens	ones	tenths	hundredths

The example above is nine-tenths. Lets look at how we'd write that as a decimal.

0	.	9	
tens	ones	tenths	hundredths

$$\frac{63}{100}$$

We do the same thing for the problem above only make sure we're in the hundredths place.

	0	.	6	3	
tens	ones	tenths	hundredths	hundredths	hundredths
